

Global Climate Risk Management Strategies (S10)

Summary on
Theme 3
Identification and analysis of
critical climate risks

Yasushi Honda, MD, PhD
(University of Tsukuba)

Strategic R&D Area Project of the Environment Research and Technology Development Fund (S-10)
“Global Climate Risk Management Strategies”
ICA-RUS International Workshop 2013, HALL 1, TIME 24 Bldg., Toyo, December 4-6, 2013

Are we estimating what we should estimate?

- ◆ **Malnutrition projection ... NOT the actual malnourished people**
- ◆ **Direct impact of warming ... NOT the net effect, but heat only**
- ◆ **Disaster projection ... NOT well-addressed population mobilization**
- ◆ **Climate modelling ... CANNOT replicate palaeoclimate**
- ◆ **Freshwater hosing experiment ... VAST model difference**

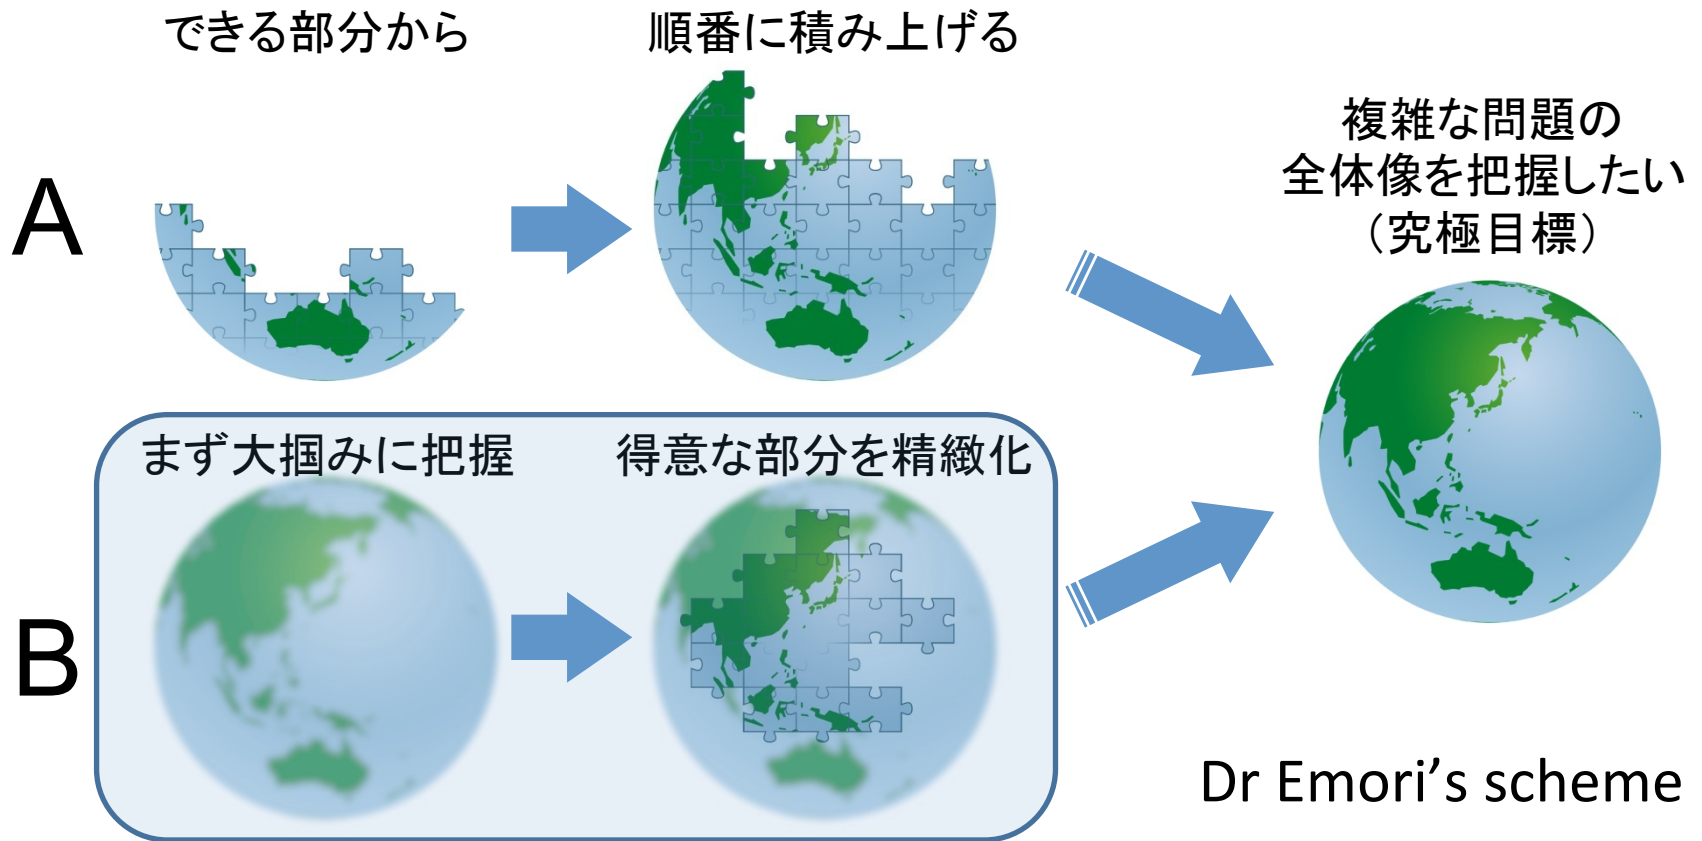

Big gap!

But we should be aware of this gap.

**How should we inform
these pieces of limited information
to policymakers?**

Basso continuo of ICA-RUS project

With “gaps” in mind!!!
