

**12th Workshop on GHG Inventories in Asia (WGIA12) on
Capacity building for measurability, reportability and verifiability**

**Vietnam Greenhouse Gas Inventory
- LULUCF - Forestland**

**Nguyen Trong Hung
Dao Minh Trang
Bach Song Lan**

Ministry of Natural Resources and Environment
Vietnam

Bangkok, Thailand
4-7th August 2014

Outline

- **Introduction**
- **LULUCF Inventory**
- **Achievements**
- **Gaps**
- **Recommendations**

Introduction

Introduction

✓ **National Strategy on Climate Change (2011)**

- Reduce 5-8% of the total energy consumption from 2011-2015

✓ **Plan of management of GHG emissions and carbon trading activities to the world market (2012)**

Carrying out the targets of GHG emission reduction and GHG absorption increase by 2020 (base year: 2005)

- ❖ *Energy: 8% (incl. transportation)*
- ❖ *Agriculture: 20%*
- ❖ *LULUCF: 20%*
- ❖ *Waste: 5%*

✓ **National Green Growth Strategy (2012)**

Reduce GHG emission (2011-2020)

- Reduce intensity of GHG emissions by 8-10%
- Reduce energy consumption per unit of GDP by 1-1.5% per year
- Reduce GHG emissions from energy activities by 10-20%

GHG Inventory - LULUCF

- **1994, 2000, 2005, 2010 (1994 for INC, 2000 for SNC and 2010 maybe for BUR1)**
- **Gain – Loss (IPCC 1996 revised, GPG 2000, GPG LULUCF 2003)**
- **Tiers (most IPCC default, REDD+ and other forest growth study of FSIV)**
- **Activity data (GSO, MARD via FPD, FIPI, FSIV)**

LULUCF inventory - National Forest Inventory Programs

Providing forest stand information such as:

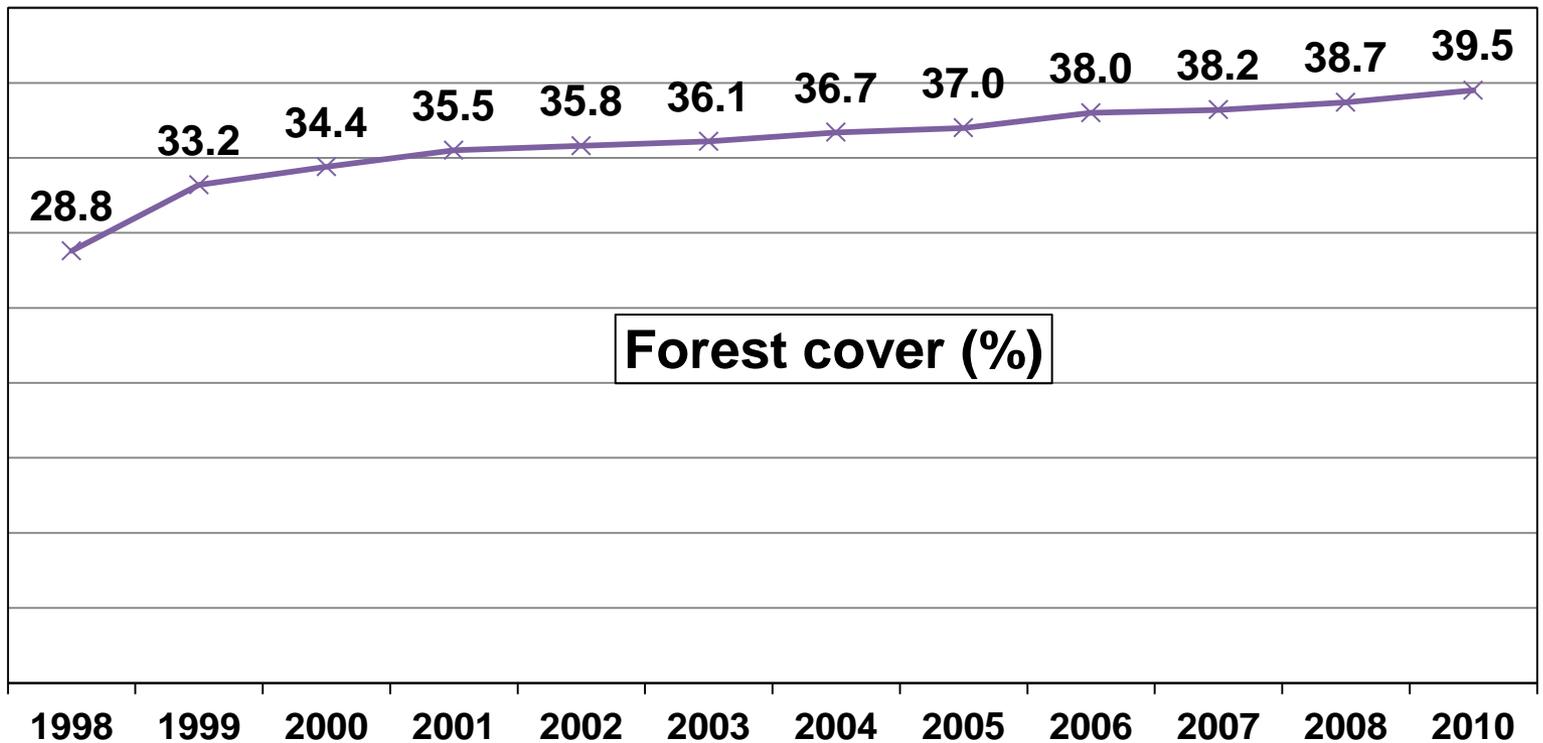

- Area,
- Forest type (species and age for plantation),
- Timber volume, density of bamboo,
- Forest owner,
- Map of forest types, map of forest owners.

LULUCF – Forest classification and area changes

3 types

- Special Use Forest
- Production Forest
- Protection Forest

LULUCF – Land category distribution

| IPCC LAND CLASSIFICATION | | | | |
|--------------------------|-----------------------------------|------|-------|--------|
| | Land use category | Unit | 2005 | 2010 |
| Forest land | Forest land remaining forest land | kha | 7,355 | 10,259 |
| | Land converted to forest land | kha | 5,262 | 3,129 |
| Cropland | Cropland Remaining Cropland | kha | 6,284 | 6,588 |
| | Land Converted to Cropland | kha | 3,082 | 3,488 |
| Grassland | Grassland Remaining Grassland | kha | 1,906 | 1,608 |
| | Land Converted to Grassland | kha | 204 | 393 |
| Wetlands | Wetlands Remaining Wetlands | kha | 1,148 | 1,155 |
| | Land Converted to Wetlands | kha | 689 | 611 |
| Settlements | Settlements Remaining Settlements | kha | 1,317 | 1,551 |
| | Land Converted to Settlements | kha | 775 | 1,040 |
| Other land | Other Land Remaining Other Land | kha | 3,848 | 1,935 |
| | Land Converted to Other Land | kha | 1,251 | 1,338 |

LULUCF- Reclassification of land use categories

| GPG LULUCF | Type of land use | GSO |
|-------------------|---|------------------------|
| Forest land | Productive forest | Agricultural land |
| | Protective forest | Agricultural land |
| | Specially used forest | Agricultural land |
| Grassland | Weed land for animal raising | Agricultural land |
| Cropland | Paddy land | Agricultural land |
| | Other annual cropland | Agricultural land |
| | Perennial crop land | Agricultural land |
| Wetland | Water surface land for fishing | Agricultural land |
| | Rivers and specialized water surfaces | Non-agricultural land |
| Settlement | Rural home stead land | Non-agricultural land |
| | Urban home stead land | Non-agricultural land |
| | Land used by offices and non-profit agencies | Non-agricultural land |
| | Security and defence land ¹⁾ | Non-agricultural land |
| | Land for non-agricultural production and business | Non-agricultural land |
| | Public land | Non-agricultural land |
| | Religious land | Non-agricultural land |
| | Cemetery | Non-agricultural land |
| Other land | Other non-agricultural land | Non- agricultural land |
| | Land for salt production | Agricultural land |
| | Other agricultural land | Agricultural land |
| | Unused flat land | Unused land |
| | Unused mountainous land | Unused land |
| | Non tree rocky mountain | Unused land |
| | Other increase ²⁾ | |

1) In the land use matrix prepared by the Land Agency, the security land and defense land are combined into one category “security and defense land” in the period 2001-2005 however they are separated in the period 2006-2010.

2) This category does not belong to Vietnamese land use categories but is included in the land use

LULUCF- Data sources

Source of data for gain-loss method for carbon stock change in Forest land remaining Forest land

| Data | Data source |
|----------------------------------|--|
| Gain | |
| Forest Area | FPD, 2005 |
| Loss | |
| Commercial Harvest | GSO, 2011 |
| Fuelwood gathering | RCFEE report (based on national study) |
| Area of fire in forest | GSO, 2011 |
| Area of destroyed forest | GSO, 2011 |
| Area subject to damage of insect | FPD, 2005 |

LULUCF- Data sources

| IPCC Category | Activity Data(AD) | AD Data Source | Publishing Frequency |
|----------------------|-----------------------------|---|----------------------------------|
| 5A. Forest Land | Forest area and volume | Forest area by province from the Forestry Protection Department (FPD). | annually |
| | | Forest area and volume in each forest type for eight eco region from Forestry Inventory and Planning Institute (FIPI) | Every five years (Not published) |
| 5B. Cropland | Area of perennial crop | General Statistic Office (GSO) | annually |
| | Converted area to Cropland | calculated from the land use matrix of the Land Agency | Every five years |
| 5C. Grassland | Converted area to Grassland | calculated from the land use matrix of the Land Agency | Every five years |

Stoking volume per area per ecozone

Standing Volume per hector in m³/ha

| | North East | North West | Red River Delta | North Central | South Central | Central Highlands | South East | South West |
|--|------------|------------|-----------------|---------------|---------------|-------------------|------------|------------|
| Natural Wood Forest - Evergreen - Broadleaf - Rich | 200 | 275 | 169 | 256 | 271 | 247 | 274 | 194 |
| Natural Wood Forest - Evergreen - Broadleaf - Medium | 130 | 111 | 123 | 137 | 167 | 164 | 142 | 179 |
| Natural Wood Forest - Evergreen - Broadleaf - Poor | 59 | 46 | 35 | 84 | 76 | 87 | 99 | 115 |
| Natural Wood Forest - Evergreen - Broadleaf - Regrowth | 18 | 25 | 25 | 41 | 66 | 82 | 82 | 45 |
| Natural Wood Forest - Deciduous | | | | | 67 | 86 | 67 | |
| Natural Wood Forest - Coniferous forest | | | | | 165 | 142 | | |
| Natural Wood Forest - Mixed Broadleaf and Coniferous | | | | | | 138 | 135 | |
| Bamboo forest | | | 0 | 0 | | 0 | 0 | |
| Mixed Wood and Bamboo forest | 57 | 47 | 71 | 61 | 80 | 88 | 108 | 50 |
| Mangrove forest | 40 | | 40 | 40 | 40 | | 40 | 21 |
| Rocky mountainous forest | 34 | 48 | 46 | 80 | | | 66 | |
| Plantation forest | 19 | 17 | 25 | 19 | 54 | 20 | 30 | 19 |

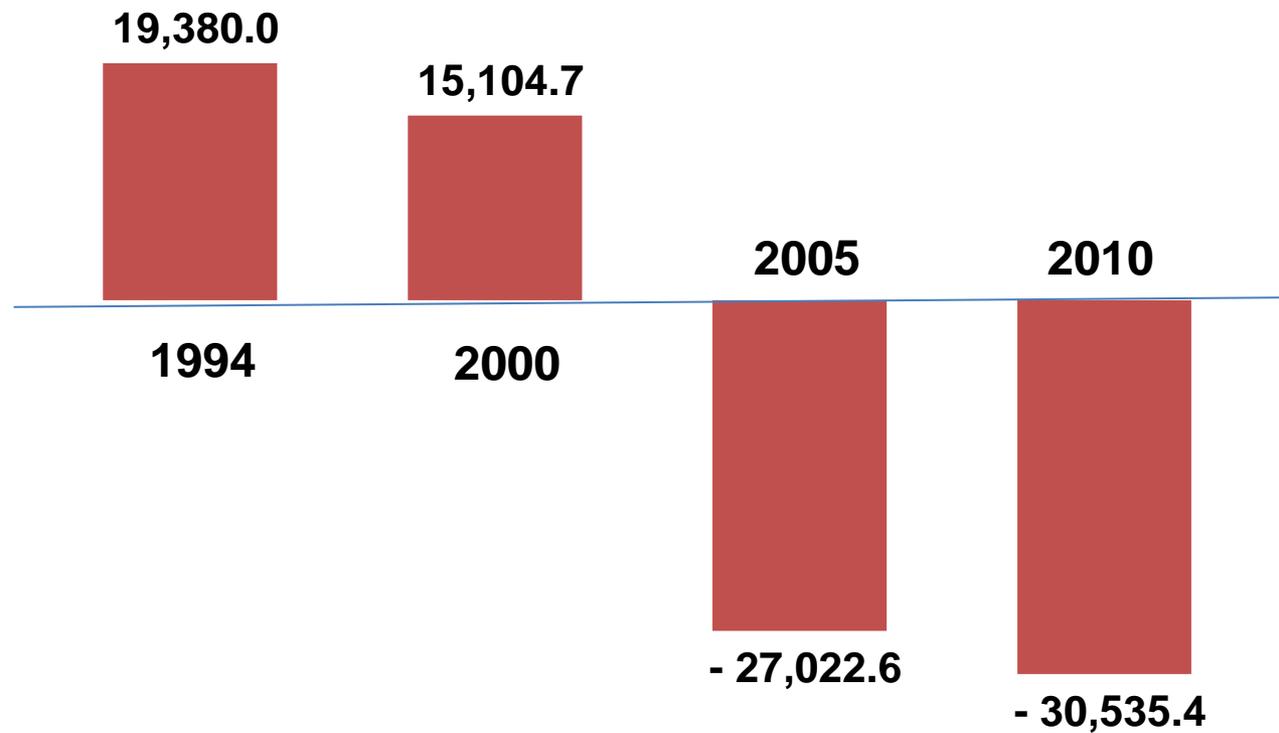

Achievements

- **NIR 2005, 2010**
- **Coordination amongst LMs,**
- **GHG Inventory system to be developed,**
- **Capacity building**

GHG inventory national staffs and related agencies are trained , on-site coach by experts of GEF, JICA, SEA project, LEAP,...

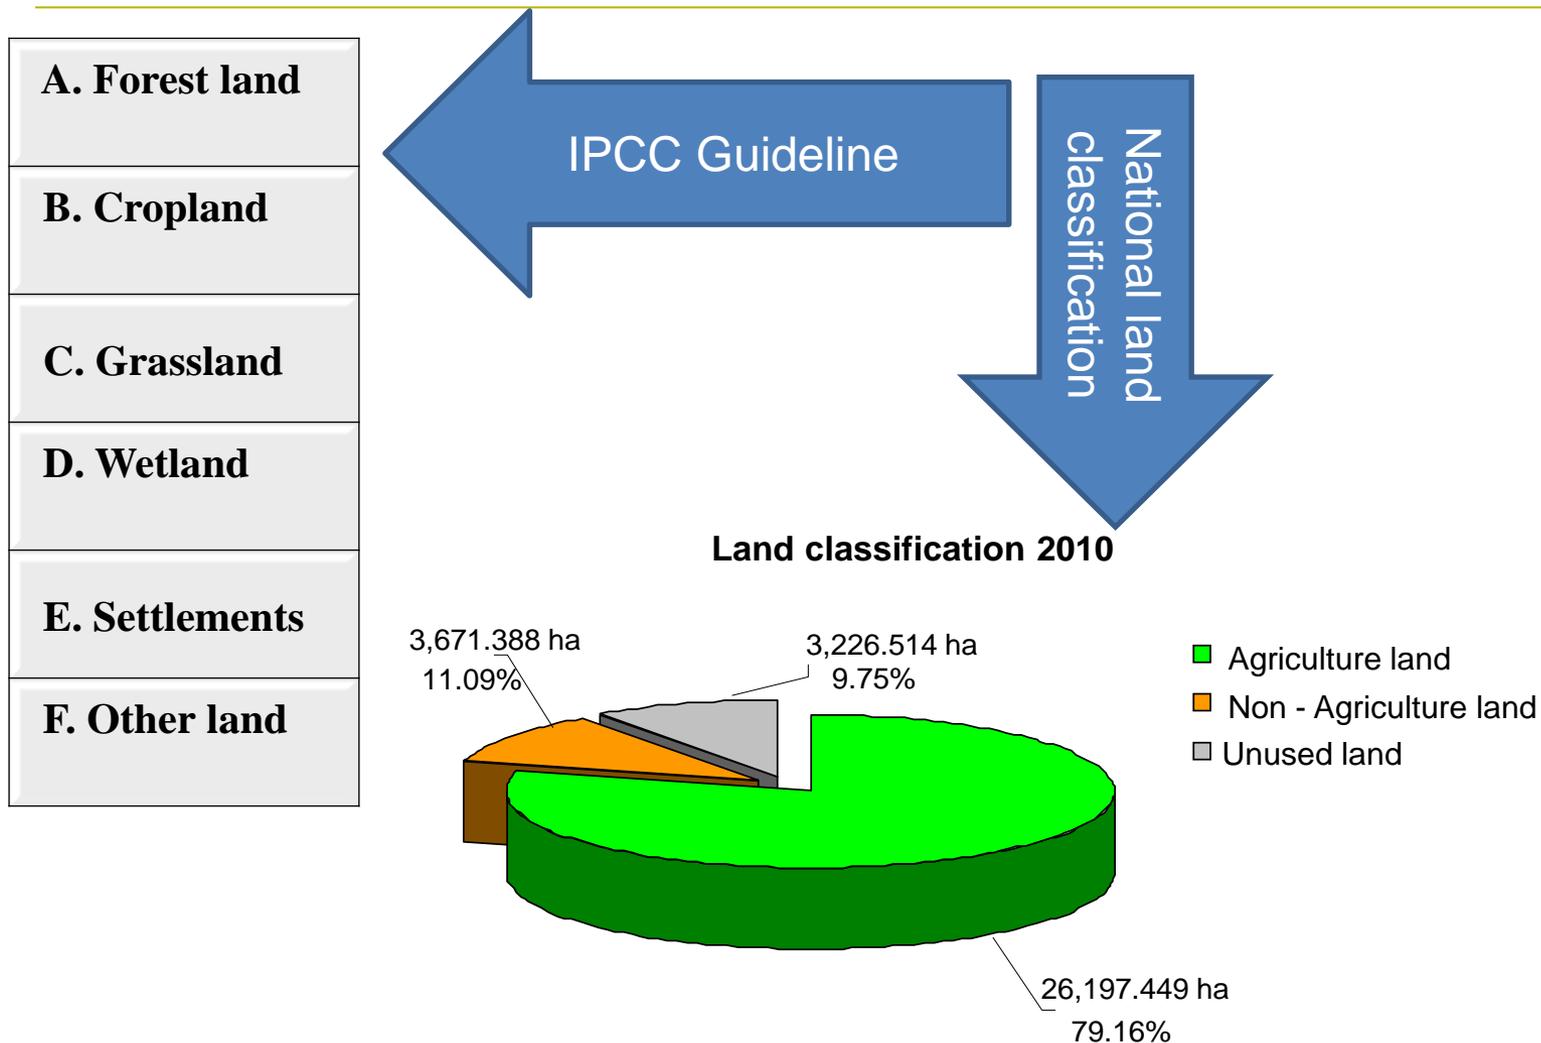

Achievement (cont')

LULUCF inventory results

Source: INC, SNC, NIR 2005 and Draft NIR 2010

Gaps (Cont') – Example in land classification

Source: MONRE, 2011

Necessary supports

- **Further training on mitigation analyzing and modeling, data archiving,**
- **Experience sharing and networking**
- **Enhance activity data for improving the accuracy of calculation in the future. E.g GHG emissions from peatland estimated**
- **Development of database for national GHGI**
- **Developing LU/LC/soil mapping system**

Necessary supports

- **Developing Country Specific for peatland, soils, mass of available fuel and the combustion efficiency or fraction of biomass combusted,**
- **“Unused flat land” and “Unused mountainous land” of the land use type might have some living biomass - country-specific parameters needs studying**
